RATE SERVICES

The following statement shows how the rate in the pound demanded is made up. It sets out the rate in the pound which would be required to meet the net expenses of each of the principal services, after allowing for specific Government Grants towards the expenses of the services marked* but without allocation to particular services of the Government Grants and other moneys receivable under the Local Government Act, 1948.

These Government Grants and other moneys under the Act of 1948, being in aid of local government expenses generally, cannot be allocated to any particular service. They reduce by the amount shown the total rate which would otherwise be demanded.
